About Ahmedabad

Ahmedabad city in western India was founded in the 15th century. It is the former capital of Gujarat and is the seventh largest city of India. It is located on the banks of the River Sabarmati. It is a bustling metropolis with beautiful classical and colonial European styled buildings, lining the city's thoroughfares. The city established itself as the home of a booming textile industry, which earned it the nickname "Manchester of India". Ahmedabad is the hub of education and Pharma industries. Ahmedabad remains the cultural and commercial heart of Gujarat and much of the western India. Moreover, the old and the new city of Ahmedabad offers different moods right from the hustle-bustle of C.G. Road in the heart of the city to a quiet retreat of the Sabarmati riverfront and Gandhi Ashram.
